Nama: Viola Gladis Adintya
NIM: 242410101044
Kelas: A

AKTIVITAS MANDIRI 1 - Instalasi & Setup Proyek Laravel

1. Instal XAMPP terbaru, pastikan PHP 8.2+ tersedia (cek: php --version di terminal)

```
PS D:\Summitbuddy - PWEB Laravel> php --version
PHP 8.3.30 (cli) (built: Jan 13 2026 22:50:40) (ZTS Visual C++ 2019 x64)
Copyright (c) The PHP Group
Zend Engine v4.3.30, Copyright (c) Zend Technologies
```

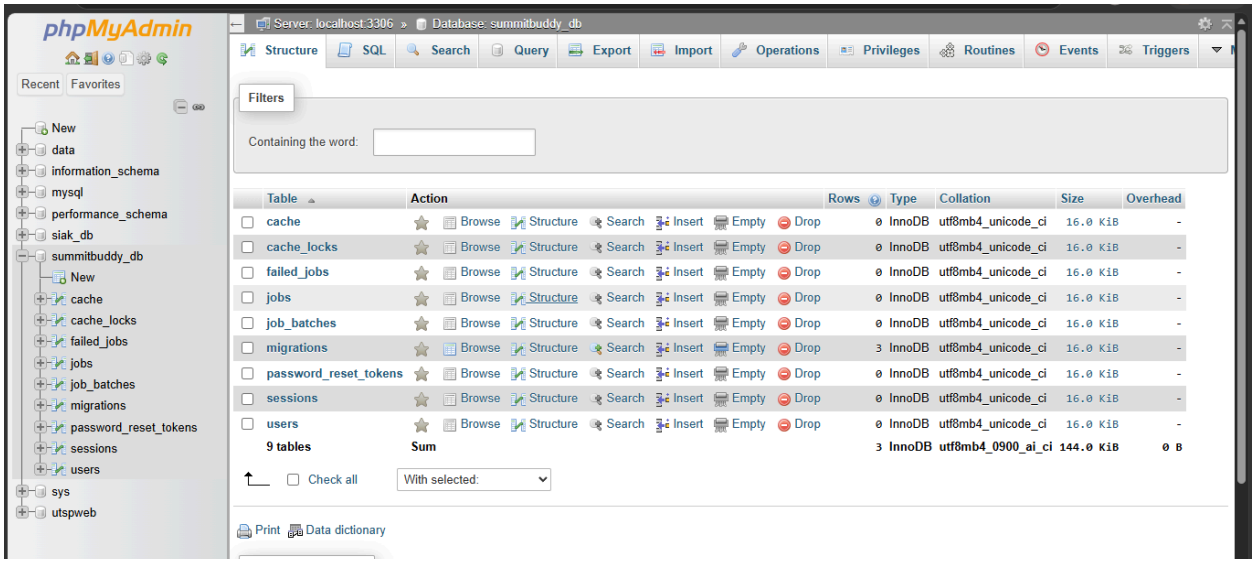
2. Instal Composer dari getcomposer.org, verifikasi dengan: composer --version

```
PS D:\Summitbuddy - PWEB Laravel> composer --version
Composer version 2.9.4 2026-01-22 14:08:50
PHP version 8.3.30 (C:\laragon\bin\php\php-8.3.30-Win32-vs16-x64\php.exe)
Run the "diagnose" command to get more detailed diagnostics output.
```

3. Buat proyek Laravel baru: composer create-project laravel/laravel siak-app

```
PS D:\Summitbuddy - PWEB Laravel> composer create-project laravel/laravel summitbuddy-app
Creating a "laravel/laravel" project at "./summitbuddy-app"
Installing laravel/laravel (v13.3.0)
  - Installing laravel/laravel (v13.3.0): Extracting archive
Created project in D:\Summitbuddy - PWEB Laravel\summitbuddy-app
> @php -r "file_exists('.env') || copy('.env.example', '.env');"
Loading composer repositories with package information
Updating dependencies
Lock file operations: 107 installs, 0 updates, 0 removals
  - Locking brick/math (0.14.8)
  - Locking carbonphp/carbon-doctrine-types (3.2.0)
  - Locking dflydev/dot-access-data (v3.0.3)
  - Locking doctrine/inflector (2.1.0)
  - Locking doctrine/lexer (3.0.1)
  - Locking dragonmantank/cron-expression (v3.6.0)
  - Locking egulias/email-validator (4.0.4)
  - Locking fakerphp/faker (v1.24.1)
  - Locking filp/whoops (2.18.4)
  - Locking fruitcake/php-cors (v1.4.0)
  - Locking graham-campbell/result-type (v1.1.4)
  - Locking guzzlehttp/guzzle (7.10.0)
  - Locking guzzlehttp/promises (2.3.0)
  - Locking guzzlehttp/psr7 (2.9.0)
  - Locking guzzlehttp/uri-template (v1.0.5)
  - Locking hamcrest/hamcrest-php (v2.1.1)
  - Locking laravel/framework (v13.6.0)
  - Locking laravel/pail (v1.2.6)
  - Locking laravel/pint (v1.29.1)
  - Locking laravel/prompts (v0.3.17)
```

4. Buat database baru 'siak_db' di phpMyAdmin



5. Konfigurasi file .env: isi DB_DATABASE, DB_USERNAME, DB_PASSWORD sesuai lokal

```
22
23  DB_CONNECTION=mysql
24  DB_HOST=127.0.0.1
25  DB_PORT=3306
26  DB_DATABASE=summitbuddy_db
27  DB_USERNAME=root
28  DB_PASSWORD=
29
```

6. Jalankan: php artisan key:generate

```
PS D:\Summitbuddy - PWEB Laravel\summitbuddy-app> php artisan key:generate

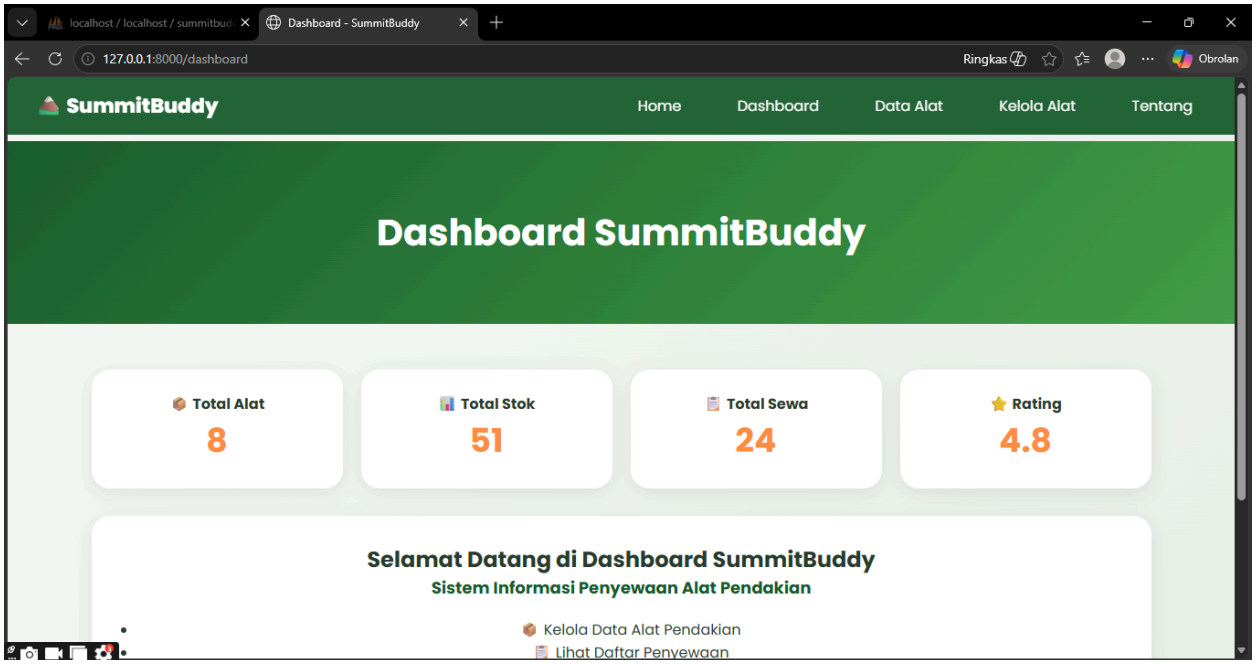
  INFO  Application key set successfully.
```

7. Jalankan server: php artisan serve - buka http://127.0.0.1:8000 di browser

```
PS D:\Summitbuddy - PWEB Laravel\summitbuddy-app> php artisan serve

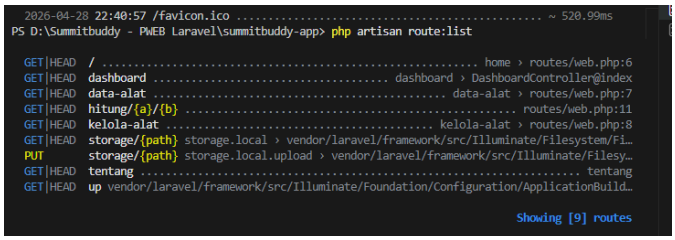
  INFO  Server running on [http://127.0.0.1:8000].

  Press Ctrl+C to stop the server
```



8. Eksplorasi struktur folder, buka setiap folder dan pahami fungsinya

9. Jalankan php artisan route:list dan catat route apa saja yang sudah terdaftar



Tips: Gunakan Laragon (laragon.net) sebagai alternatif XAMPP - lebih ringan dan mendukung Laravel secara native dengan virtual host otomatis.

AKTIVITAS MANDIRI 2 - Membuat Routing & Controller Dashboard

1. Buat Controller DashboardController: php artisan make:controller DashboardController

```
PS D:\Summitbuddy - PWEB Laravel\summitbuddy-app> php artisan make:controller DashboardController
>>

  INFO  Controller [D:\Summitbuddy - PWEB Laravel\summitbuddy-app\app\Http\Controllers\Dashboard
Controller.php] created successfully.
```

2. Tambahkan method index() yang mengembalikan view('dashboard') di DashboardController

```php
<?php

namespace App\Http\Controllers;

use Illuminate\Http\Request;

class DashboardController extends Controller
{
    public function index()
    {
        return view('dashboard');
    }
}
```

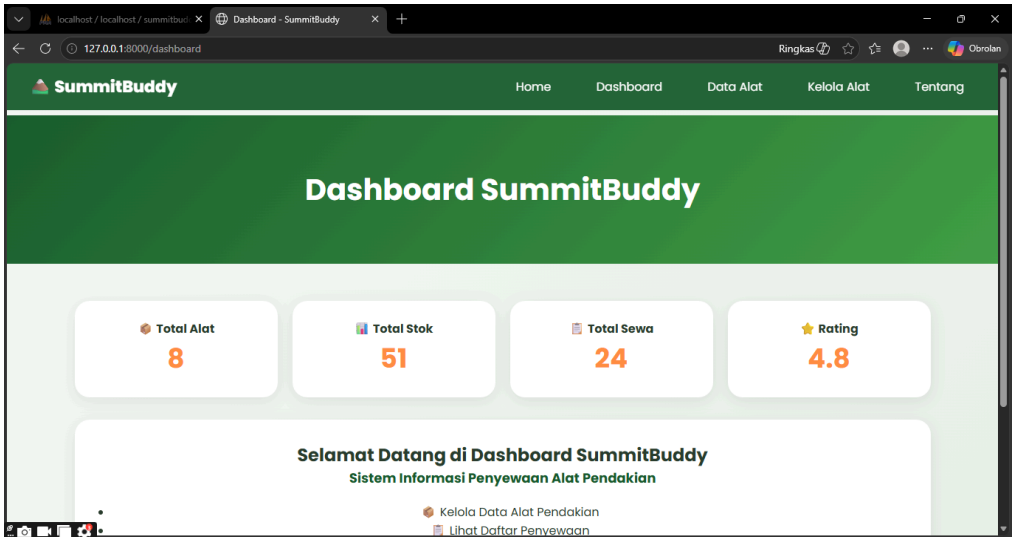
3. Daftarkan route di routes/web.php: Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard')

```php
Route::get('/kelola-alat', function () {return view('kelola-alat');})->name('kelola-ala
Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard');
```

4. Buat file view sementara resources/views/dashboard.blade.php berisi '<h1>Dashboard SIAK</h1>'

```blade
<div class="card" style="padding: 30px;">
    <h1>Selamat Datang di Dashboard SummitBuddy</h1>
    <p>Sistem Informasi Penyewaan Alat Pendakian</p>
    <ul style="margin-top: 20px; margin-left: 20px;">
        <li>📦 Kelola Data Alat Pendakian</li>
        <li>📋 Lihat Daftar Penyewaan</li>
        <li>⭐ Kelola Ulasan Pelanggan</li>
        <li>📊 Lihat Statistik Penyewaan</li>
    </ul>
</div>
```

5. Akses http://127.0.0.1:8000/dashboard di browser - pastikan tampil



6. Buat route /tentang dengan Route::view('/tentang', 'tentang') dan buat view-nya

```
10  Route::view('/tentang', 'tentang')->name('tentang');
11  Route::get('/hitung/{a}/{b}', function ($a, $b) {return $a + $b; });
12
```

```
Go  Run  ...   Summitbuddy - PWEB Laravel
web.php | DashboardController.php | tentang.blade.php | dashboard.blade.php
summitbuddy-app > resources > views > tentang.blade.php > ...
1  @extends('layouts.app')
2
3  @section('title', 'Tentang - SummitBuddy')
4
5  @section('hero')
6  <div class="hero-small">
7      <h1>Tentang SummitBuddy</h1>
8  </div>
9  @endsection
10
11 @section('content')
12 <div class="card" style="padding: 40px;">
13     <h2>Tentang SummitBuddy</h2>
14     <p>Sistem Penyewaan Alat Pendakian</p>
15     <p>Melayani penyewaan alat pendakian gunung sejak 2024</p>
16
17     <h3>📞 Kontak Kami</h3>
18     <p>Alamat: Jl. Pendaki No. 123, Bandung</p>
19     <p>Email: info@summitbuddy.com</p>
20     <p>Telepon: 0812-3456-7890</p>
21
22     <h3>🛠 Teknologi</h3>
23     <p>Laravel 11, PHP 8.2+, MySQL, Blade Template</p>
24 </div>
25 @endsection
26
```

7. Jalankan php artisan route:list - amati semua route yang terdaftar

```
PS D:\Summitbuddy - PWEB Laravel\summitbuddy-app> php artisan route:list

  GET|HEAD  / ..................................... home › routes/web.php:6
  GET|HEAD  dashboard ............... dashboard › DashboardController@index
  GET|HEAD  data-alat ............... data-alat › routes/web.php:7
  GET|HEAD  hitung/{a}/{b} ........ routes/web.php:11
  GET|HEAD  kelola-alat ........... kelola-alat › routes/web.php:8
  GET|HEAD  storage/{path} storage.local › vendor/laravel/framework/src/Illuminate/Filesystem/Fi…
  PUT       storage/{path} storage.local.upload › vendor/laravel/framework/src/Illuminate/Filesy…
  GET|HEAD  tentang ..... tentang
  GET|HEAD  up vendor/laravel/framework/src/Illuminate/Foundation/Configuration/ApplicationBuild…

                                                                  Showing [9] routes
```

8. Coba buat Route::get('/hitung/{a}/{b}', fn($a, $b) => $a + $b) dan akses /hitung/10/25

```
11  Route::get('/hitung/{a}/{b}', function ($a, $b) {return $a + $b; });
```

Tips: Route::view() adalah shortcut untuk route yang hanya menampilkan view tanpa logika. Sangat berguna untuk halaman statis seperti 'Tentang Kami'.
